

ENVIRONMENTAL POLICY

PROMOCIONES TURISTICAS MEYBRU, S.A., represented in its business at Camping Valldaro by Ms. Núria Mestres, issues the following Statement of Environmental Policy, which is valid for all the activities and facilities operated within our campsite, and which includes the commitments and general principles of our company with respect to the environment

We undertake to go about our business with the greatest respect for and protection of the environment, implementing continuous improvements, wherever it is within our power, to our techniques, practices and environmental strategies, and thereby co-operate with the concept of sustainable tourism.

We recognise our responsibilities towards the environment, which we here list as our General Principles:

-To have in place a permanent system of checks in order to ensure that we comply with relevant environmental regulations, and, where possible, go beyond the measures required by law.

-To continue to promote selective collection of general waste generated by campers, to manage special category waste generated, and to minimise waste as far as possible. Increase the valuable collection.

-To take appropriate measures in order to reduce consumption of water and energy.

-To manage properly the outflow of waste water in order to harmonise its environmental impact.

-To involve all those concerned in working towards environmental improvements:

-Encouraging worker involvement in Environmental Management, and keeping workers informed and trained.

-Informing clients on the environmental status of the campsite and providing advice on good practice.

-Informing suppliers of our environmental commitments and providing training in the tasks they should perform.

-To develop communication with clients as a channel for the promotion of care for the environment.

-To draw up an annual programme of objectives with an environmental focus.
